Abstract:

Our project focuses on developing a dynamic e-commerce website dedicated to furniture sales, designed to offer a comprehensive and seamless shopping experience. The website will feature an extensive inventory of furniture for various spaces, including Kitchen, bedrooms, and outdoor areas, sourced from top manufacturers and designers. Key functionalities will include advanced search and filtering options, detailed product descriptions, high-resolution images, customer reviews, and a personalized recommendation engine.

The site will support multiple secure payment methods and provide a streamlined checkout process. Features such as user accounts, wishlists, and order tracking will enhance user engagement and satisfaction.

The objective is to create a reliable, user-friendly platform that simplifies the furniture shopping experience, meeting the demands of modern consumers while driving sales and fostering customer loyalty.

Introduction:

In this course we learned about how to make a website for both front end and back end, so at the first we learned how to make a page using html language and then add some style it using css language, and to make the pages of our website dynamic, we use the functionality of JavaScript language. After that, we connect our website to the Data base using php language and run it using XXAMP server.

Our project was made to controlling a database for Furniture website, so we using PhpStorm to design the FrontEnd side of our website, then connect this website with mySql database, then dealing with data in this database.

Furnico is company website where elegance meets functionality! At Furnico, we believe that every piece of furniture should not only be a statement of style but also a testament to comfort and quality. Our diverse collections are meticulously curated to cater to every taste, from contemporary chic to timeless classics.

Join us in creating spaces that reflect your unique personality and lifestyle. At Furnico, your dream home is just a click away. Welcome to a world of inspired living!

Project requirements:

The Furnico has **Products**, each one has an Id, name, description, price, category id, stock Quantity, color, and image url.

The products devides into different **Categories** , each category has an ID, and name.

In **Users** table we have user id, user name, user password, user level, user full name, user email, user address, user city, user dtate, user ZIP, user card name, user card number, user exp month, user exp year, user CVV, and is manager attribute, these are for each user, also we have two types of user, the first one is Maneger, and the second is visitor.

Each user can send a massage as a feedback of our website, and the massage store in the **Reviews** table, which contains reviews id, first name, last name, user email, user phone, and the massage. So the table help the manager to contact with users easily.

Each user has a cart bag, can put in it any products that he want to buy it, so the **Cart** table has cart id, user id, product id, product name, qnt, price, total price.

Also, the user has a favourite list, he can put in it any products that he want to save it to access it easily, so the **Favourite** table has favourite id, user id, product id, product name, price.

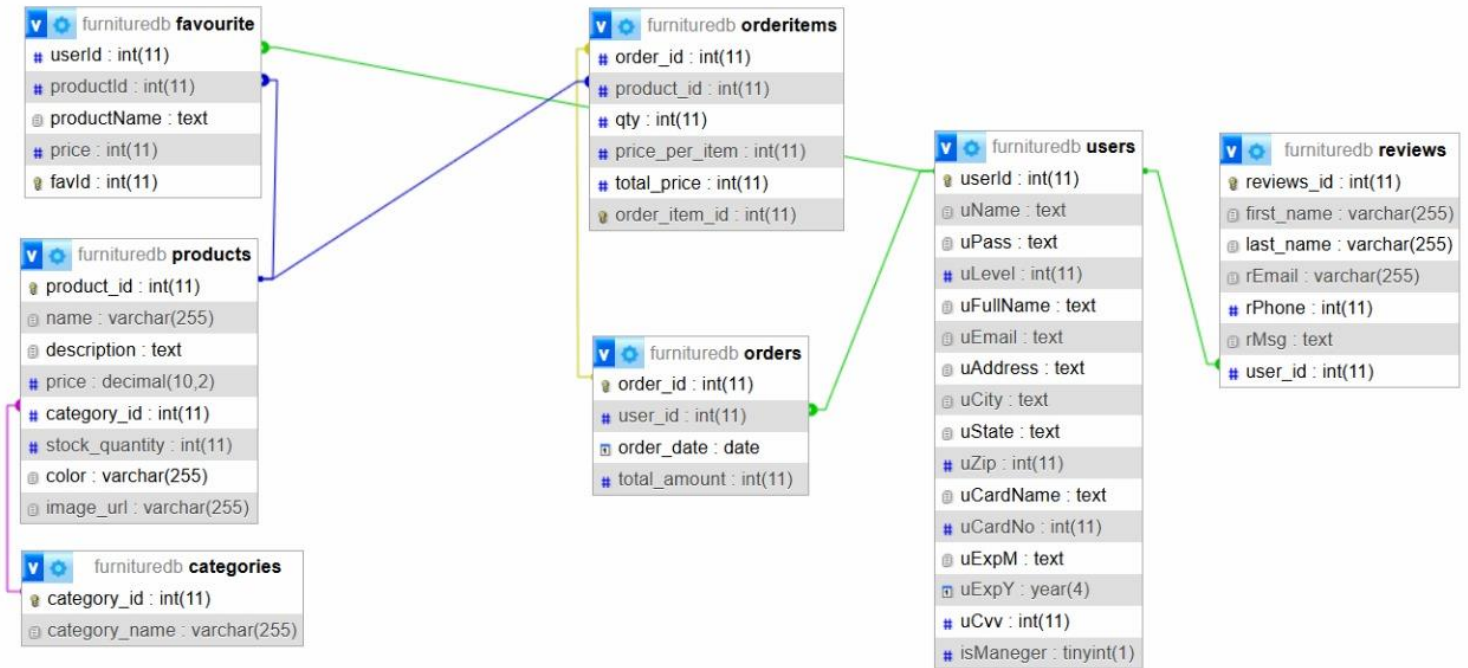

When the user click on buy now, then the order oh him will registerd in **Orders** table, which contains order id, user id, order date, total amount.

Also, we have **Order Items** table which contains all items that the user orderd, and the table attribute are: order item id, order id, product id, qty, price per item, total price.

Tools:

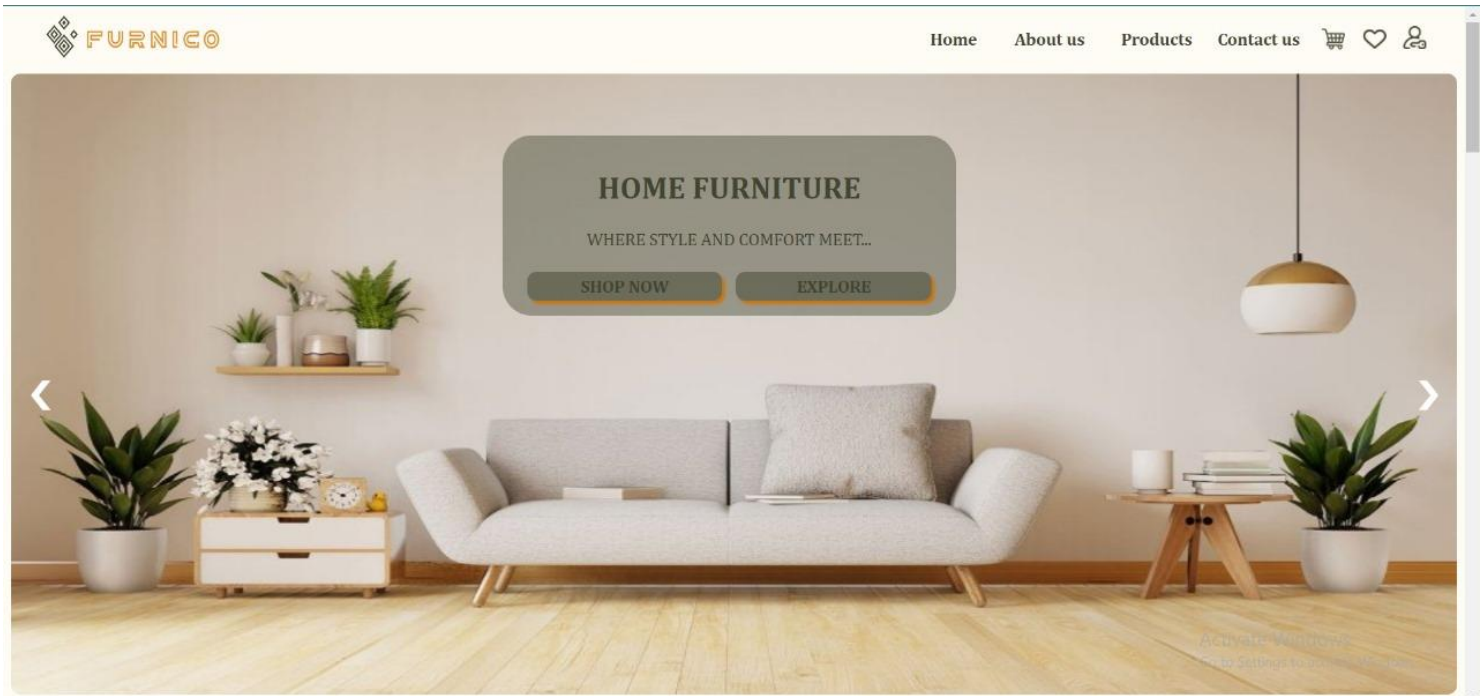

- Php Storm.
- XXAMP webserver.
- Canva.

UML diagram:

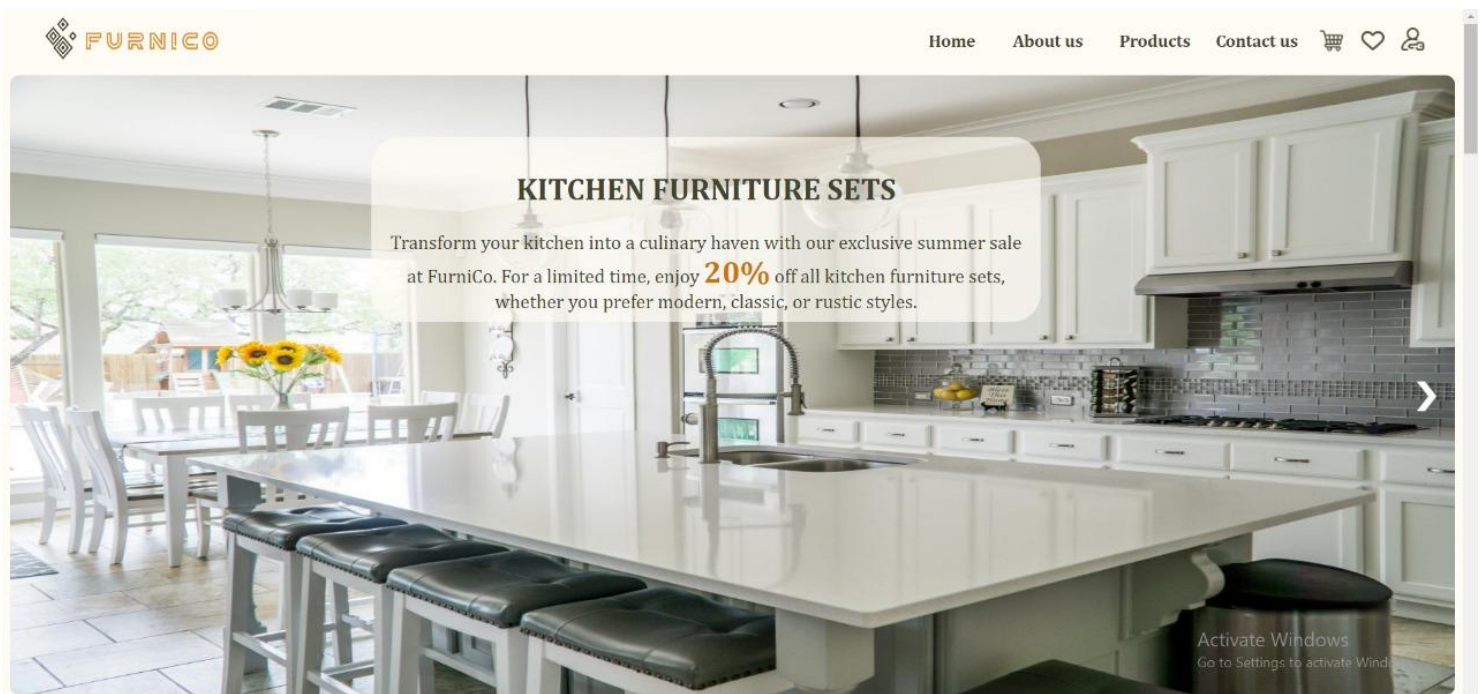

Discussion:

Firstly, we have the Home page,

it consist image sildes ,

Exclusive Office Furniture Offer from FurniCo

Upgrade your workspace with our special office furniture offer at FurniCo! Enjoy up to **30%** off on ergonomic chairs, modern desks, storage solutions, and conference room furniture.

Living Room Furniture Offer from FurniCo

Elevate your living space with our special offer at FurniCo! Get up to **30%** off on stylish sofas, elegant coffee tables, and cozy lounge chairs.

Also, it contains a nav bar that consists Home, About Us, Products, Contact Us, Favourite list, cart list, and log in /log out.

When the user clicks on About us in nav bar, then it takes it to about us paragraph in the same home page.

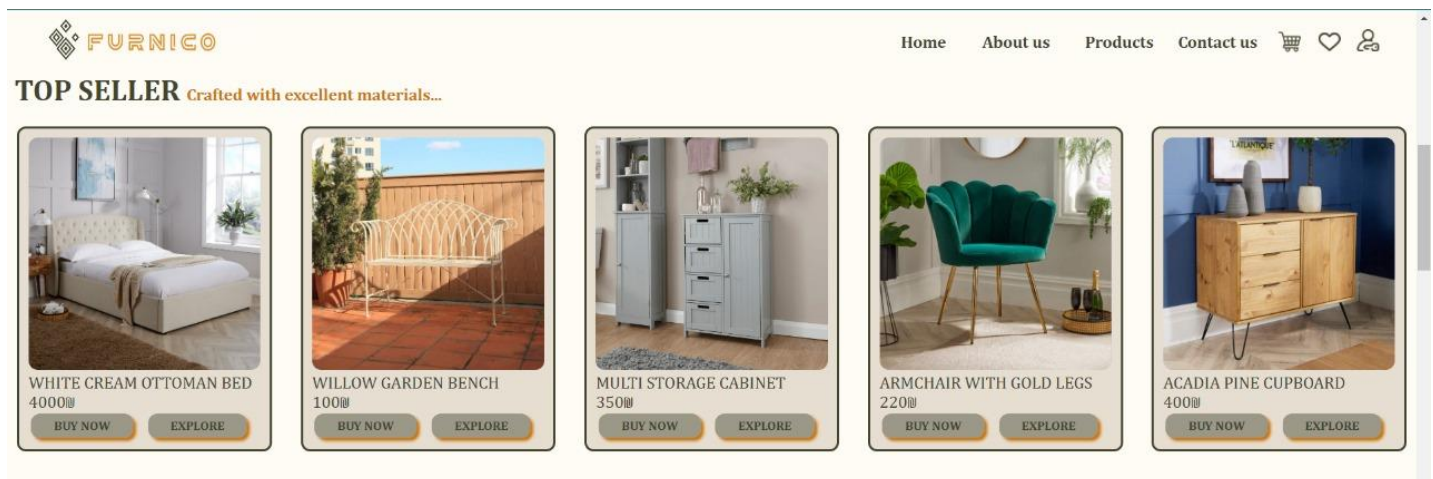

ABOUT US

At FURNiCo Company, our focus is simple. We offer high quality furnishings at affordable prices. Our team of trained buyers source the finest products from all over the world, ensuring we deliver the best quality furniture with modest pricing. With something for every home, we offer a huge range of furniture and homeware products. Each item is carefully selected, keeping our reputation for providing the best products at the best prices in mind. As one of the UK's leading furniture websites, our customers will always come first. We may also be able to offer discounts for large and multiple orders. We believe that every home deserves the highest quality of furniture. Our options include furnishings for bedrooms, offices, gardens, hallways, kitchens, dining and living areas plus storage facilities. We pride ourselves on delivering the best customer service and we are so confident in our furnishings that we offer a 30 day cancellation policy.*

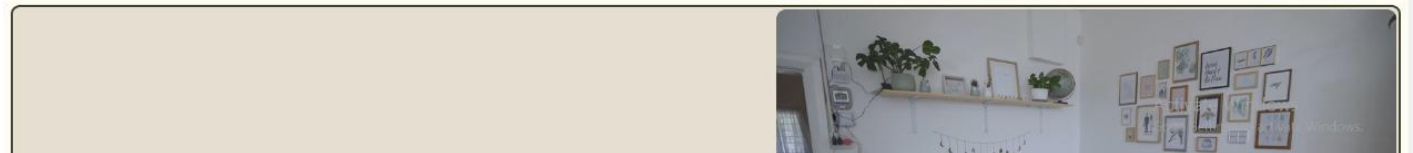

*Goods must be returned as new in the original packaging. For further information, please see our returns policy.

The rest of home page contains the following :

LAST ARRIVAL

FOUR STEPS TO ORDER FURNITURE FROM OUR COMPANY

Tell Us About Your Move

Tell us where you're moving to and how long you'll be there. The longer your lease length, the lower your monthly cost.

Furniture And So Much More

Select a Move-In Ready™ package and let us design a whole home package for you. Or choose your own items for a personalized look.

Schedule Delivery

Select the delivery date that fits your schedule, and we'll handle everything from delivery to set up.

Return

When you're ready, schedule your return. We'll come pick up everything and take it away.

SEND MESSAGE

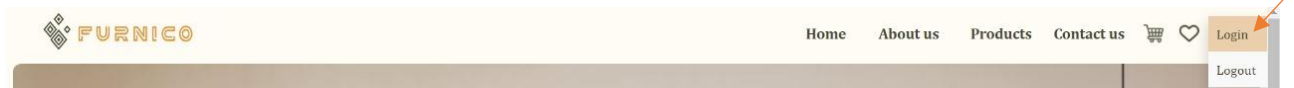

Then the alert will appear:

			▼	reviews_id	first_name	last_name	rEmail	rPhone	rMsg	user_id	▼ 1
☐		Edit		Copy		Delete					
				1	John	Doe	john.doe@example.com	12345678	Great product! Highly recommend.		1
				2	Jane	Smith	jane.smith@example.com	21474836	The sofa is very comfortable and stylish.		1
				3	Alice	Johnson	alice.johnson@example.com	21474836	Fast delivery and excellent customer service.		1
				4	Raheeq	Qassrawi	qassrawiraheeq@gmail.com	599558	hi		1
				5	Shams	Aziz	shams@1234	1522433	hhi		1
				7	Ali	Salem	ali@gmail.com	599558	the best furniture website		1

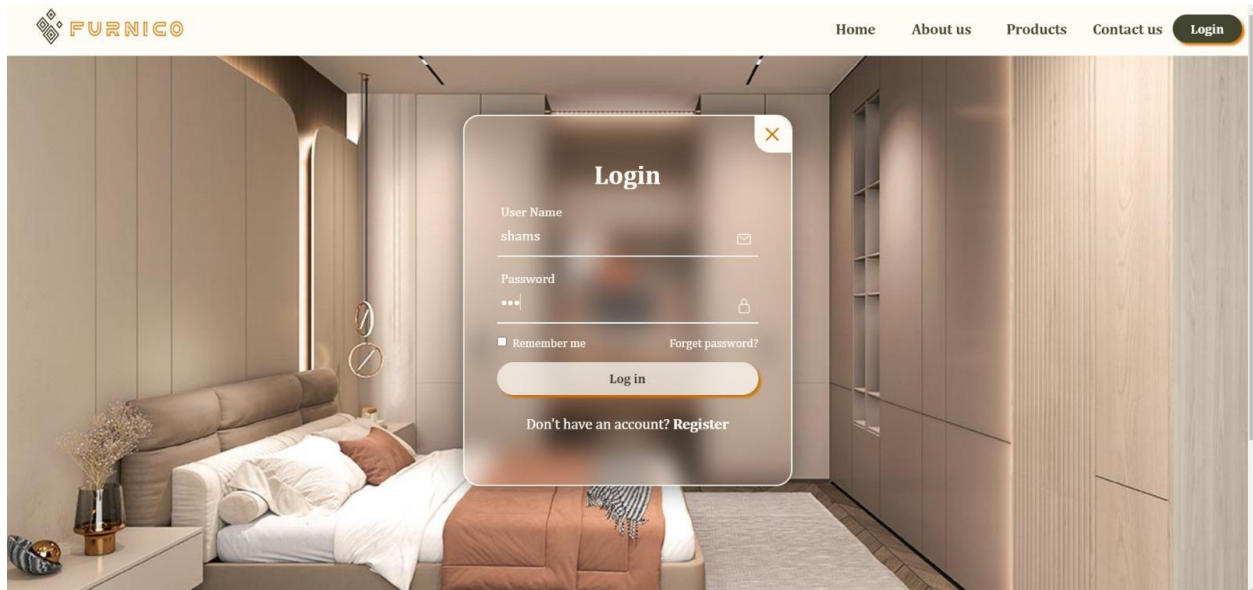

When the user clicks on login in the following :

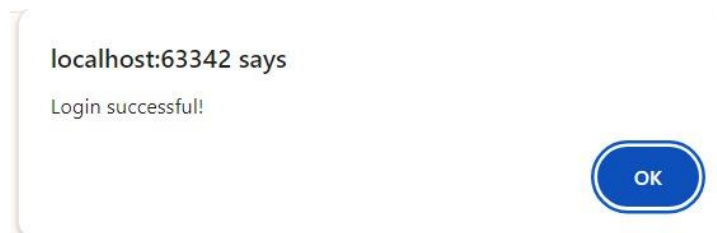

Then it takes him to login page.

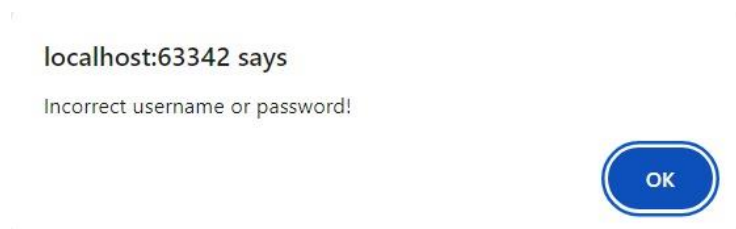

When the user enter the information about his account like this:

Then an alert massege will appear like the following:

If the user enter the information incorrectly the following alert massege will appear:

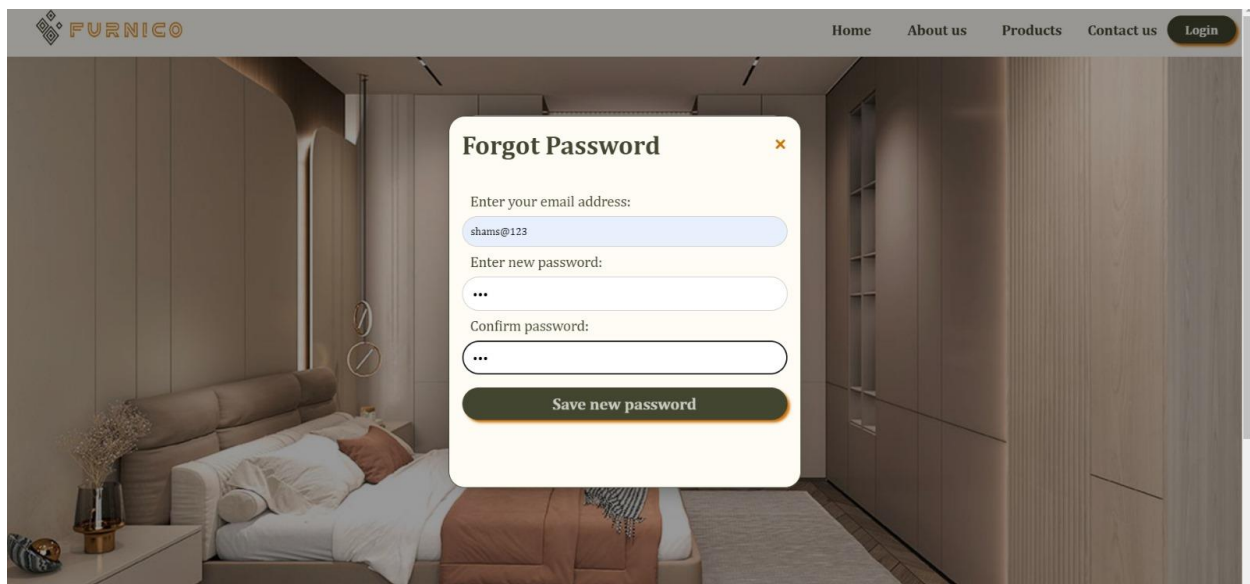

After login the website goes to home page.

If the user is manager the following alert will appear :

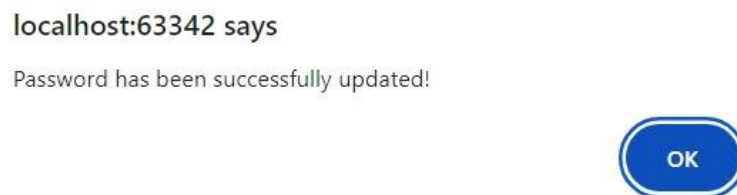

After login the website goes to manager products page to add products.

Also, if the user forget his password he can click into forget password to edit his password according to his email.

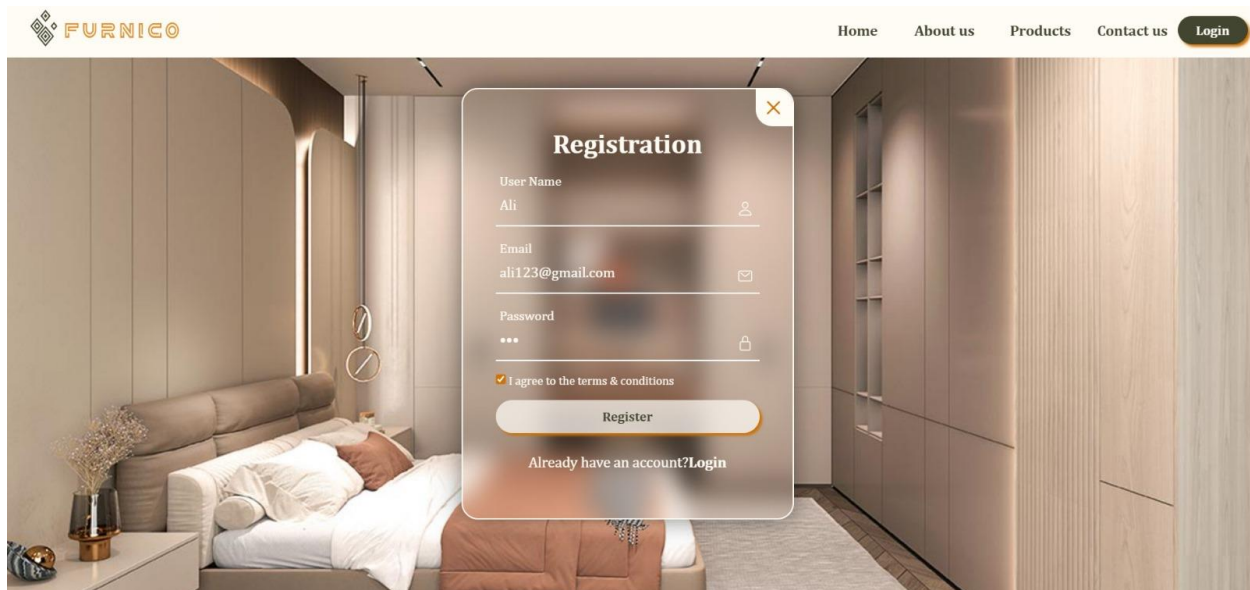

If the user click to save new password the following alert will appear :

After forget password form the website goes to login page to add login with his new password.

Now the user can register to become in furnico customer:

The image shows a registration form overlay on a website background. The form is titled "Registration" and contains the following fields: User Name (Ali), Email (ali123@gmail.com), Password (masked with dots), and a checkbox for "I agree to the terms & conditions". Below the fields are two buttons: "Register" and "Already have an account? Login". The background of the website shows a modern bedroom interior with a bed and wardrobes.

If the user click to Register button the alert will appear as follows:

	userid	uName	uPass	uLevel	uFullName	uEmail	uAddress	uCity	uState	uZip	uCardName	uCardNo
☐ Edit Copy Delete	1	shams	40bd001563085fc35165329ea1ff5c5ecbdbbeef	0	Shams Aziz	shams@123	542 W. 15th street	New York	NY	10001	Shams Imad	11
☐ Edit Copy Delete	2	raheeq	40bd001563085fc35165329ea1ff5c5ecbdbbeef	0	Shams Aziz		542 W. 15th street	New York	NY	10001	Shams Imad	22222
☐ Edit Copy Delete	3	Ahmad	40bd001563085fc35165329ea1ff5c5ecbdbbeef	0		ahmad123@ss.com				0		0
☐ Edit Copy Delete	4	Ali	40bd001563085fc35165329ea1ff5c5ecbdbbeef	0		ali123@gmail.com				0		0

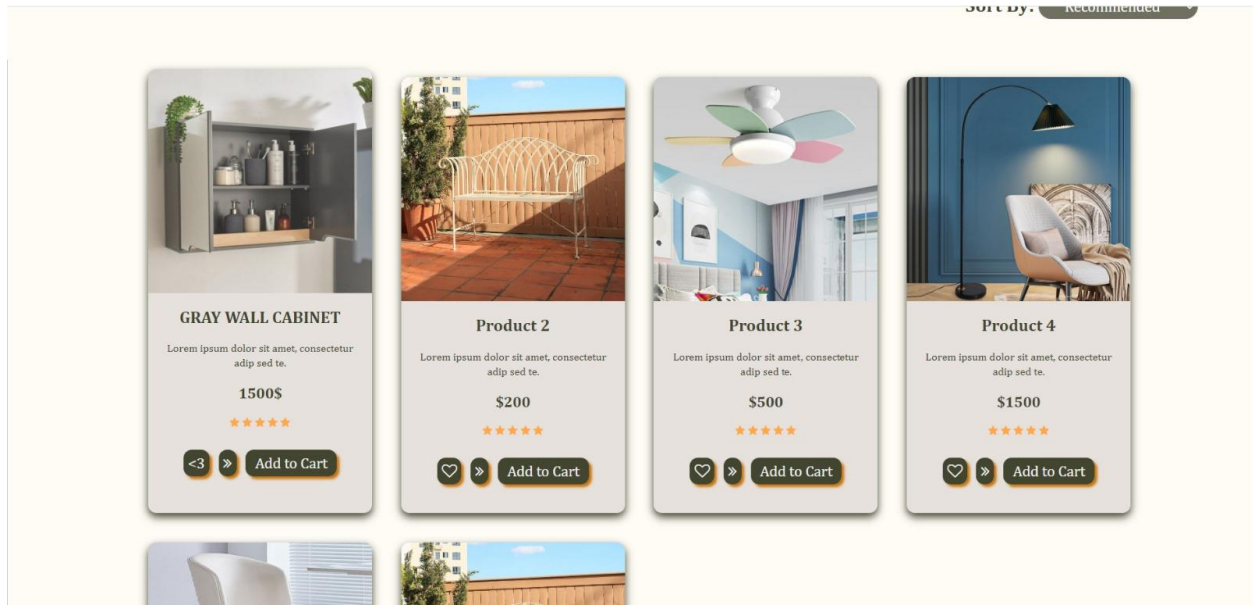

Now if the user click on Products the the website goes to Products page as follows.

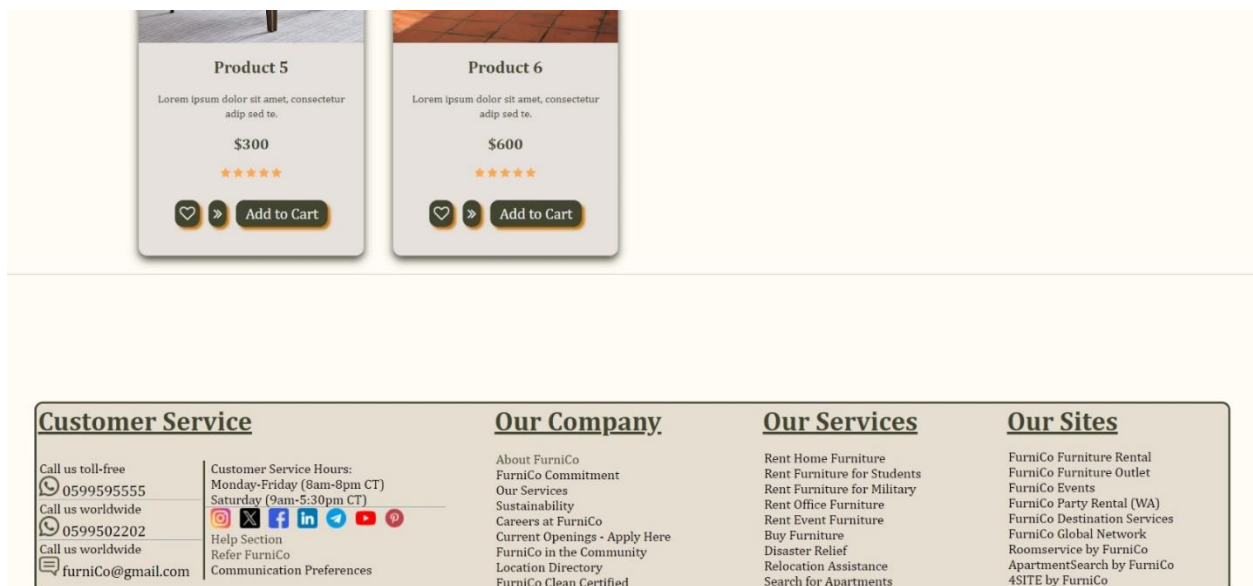

Here we have this nav that divides products into categories as the following:

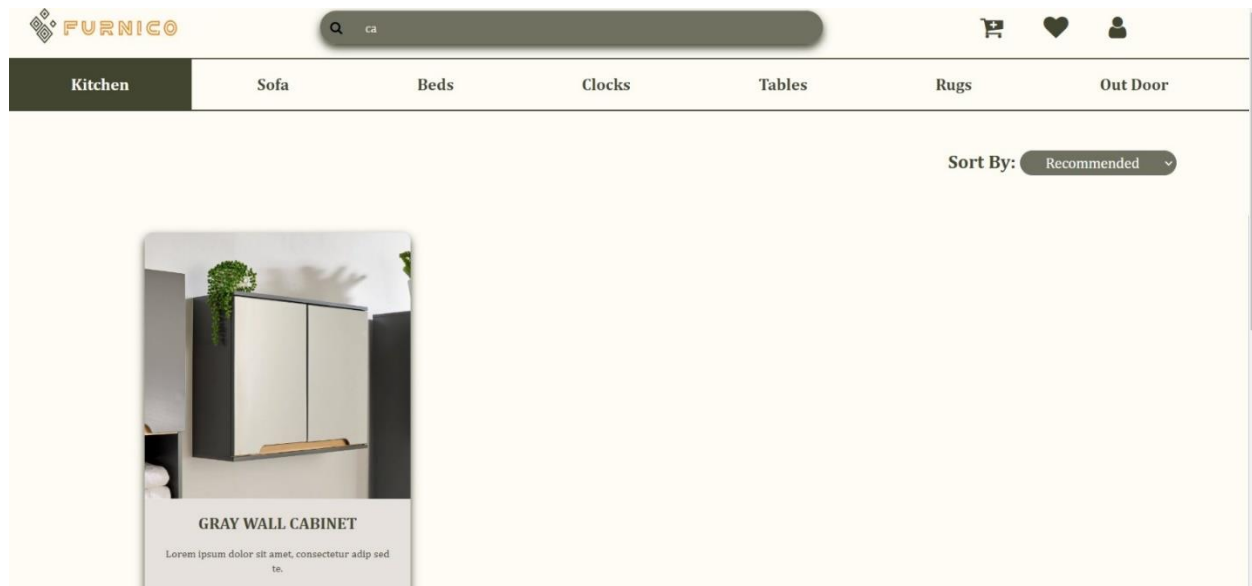

If the user hover any product the image will change and the box will goes up this happened using onmouseover in javascript and css transition.

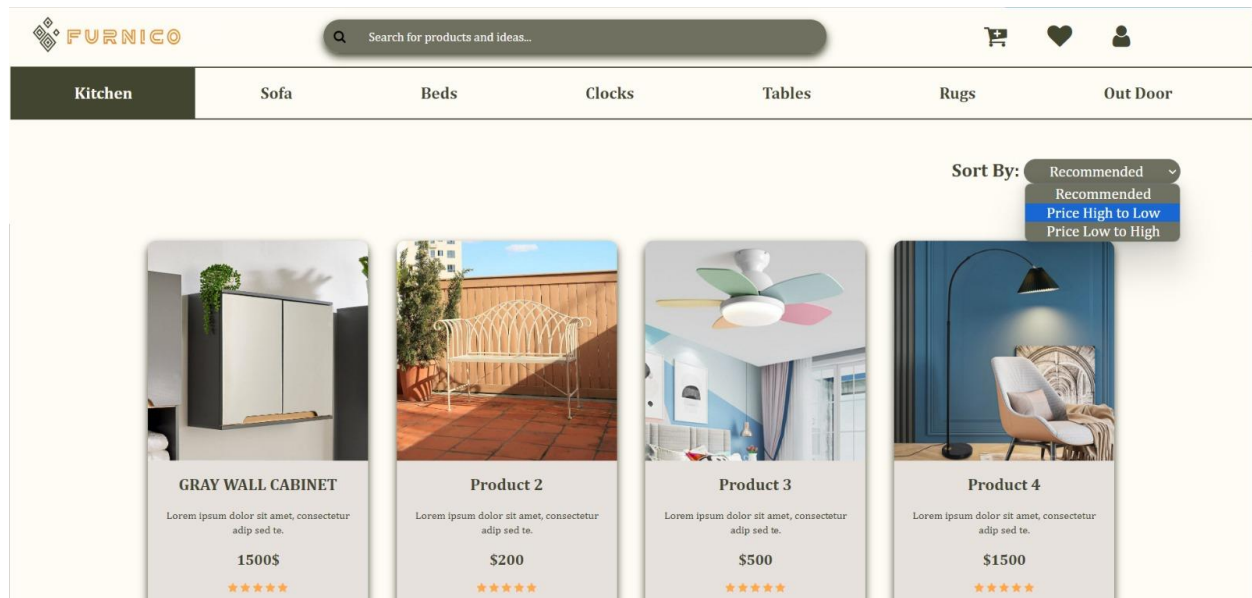

The rest of page:

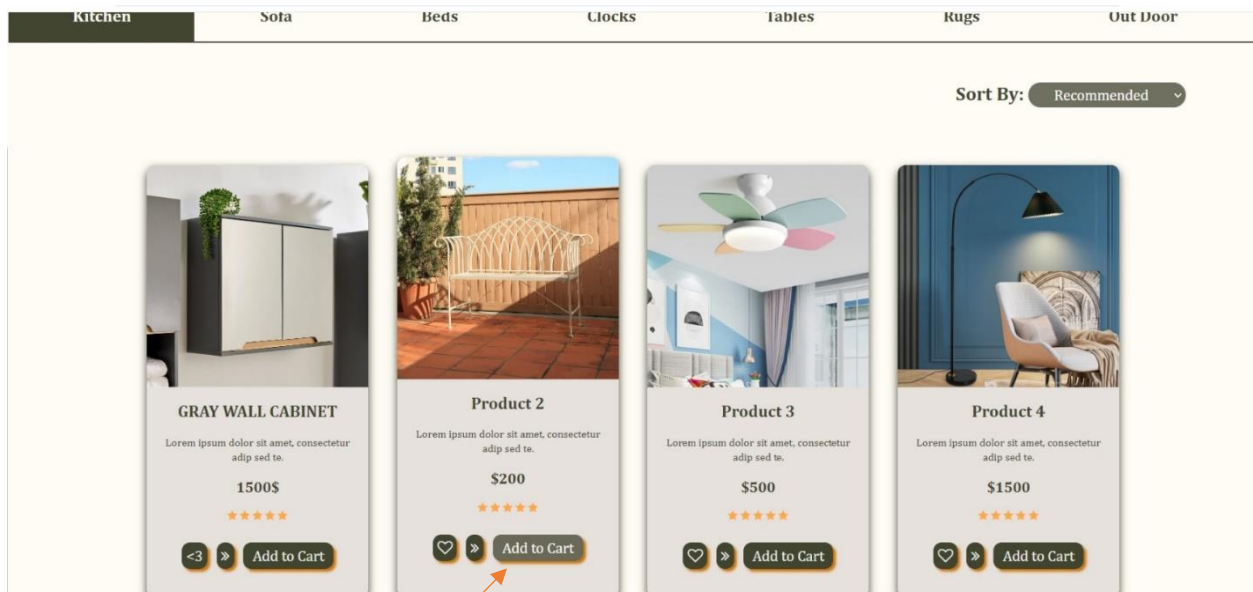

Here we can search about any product we need:

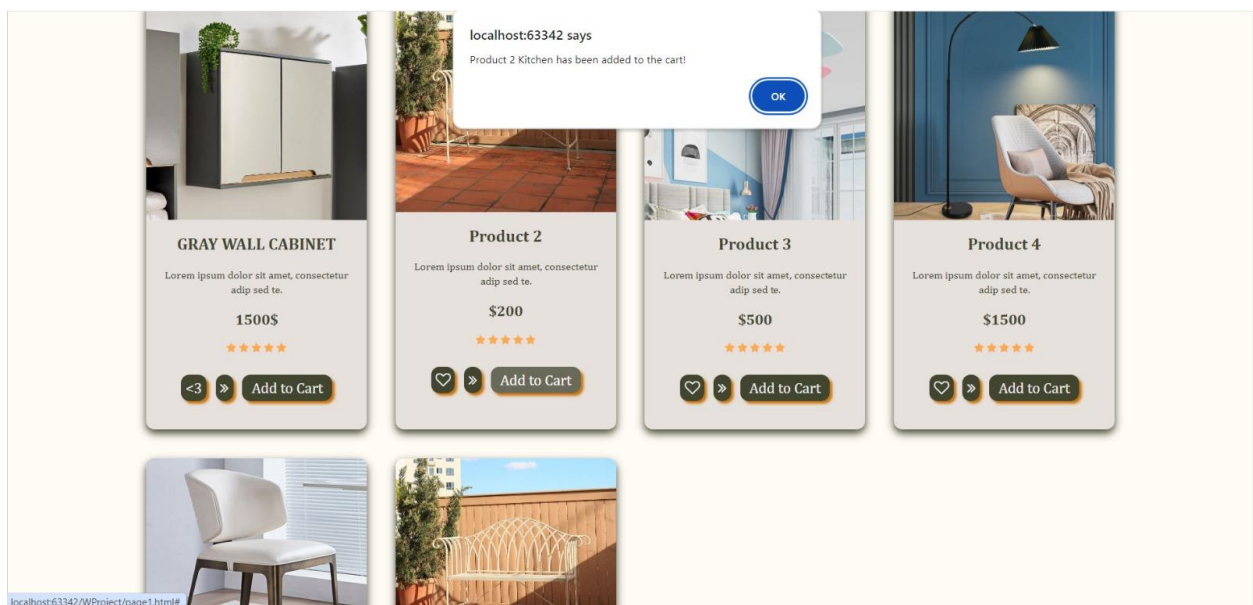

Here the user can filter the products from low to high price, and from high to low price as the following:

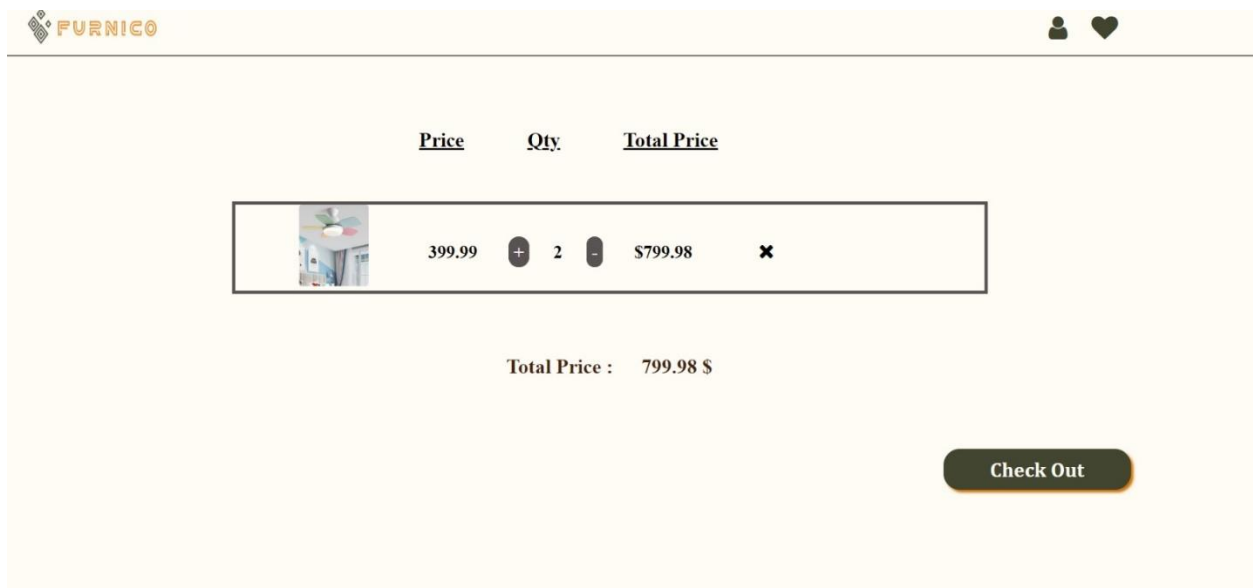

When the user click to add to cart button the alert massege will appear as follows:

Then if the user want to see the cart just click on this button or on the one in the home page:

The cart page will appear as follows when the user add products to his cart:

In database this will appear:

	cartId	userId	productId	productName	qnt	price	totPrice	orderId
☐ Edit Copy Delete	1	1	2	Product 2 Kitchen	2	400	799	0

As we see the order id equal zero but when we click on check out like the following :

After this in the orders table the order will be inserted :

	order_id	user_id	order_date	tot_amount
☐ Edit Copy Delete	1	1	2024-06-19	799

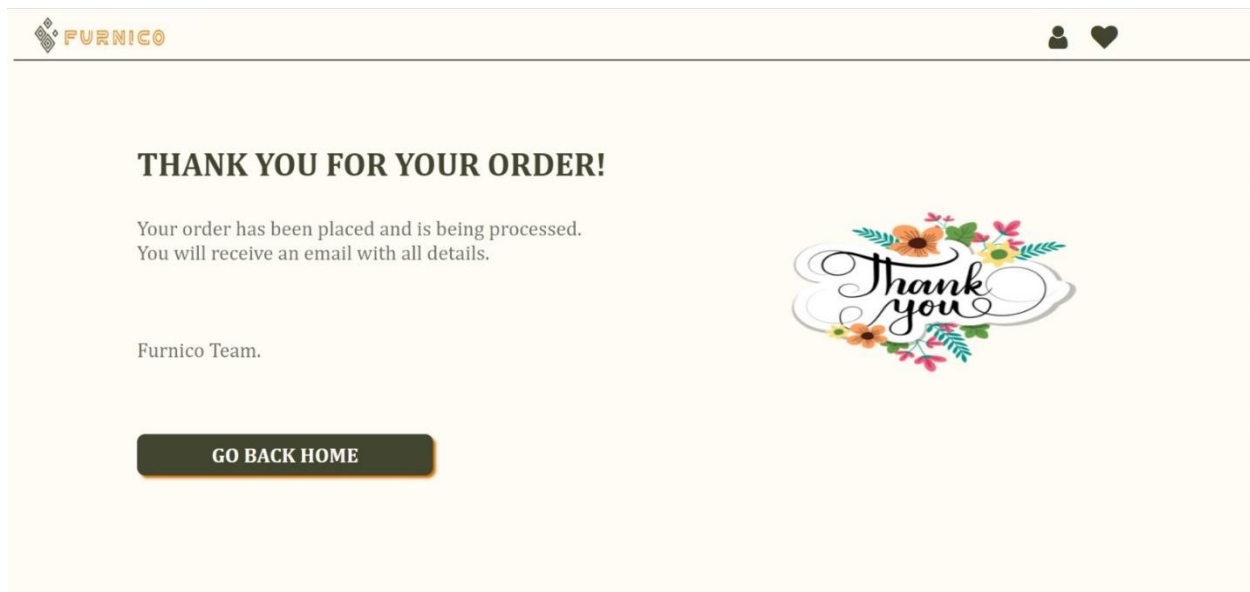

Then in order items table the order content will be inserted:

	order_id	product_id	qty	price_per_item	total_price	order_item_id
☐ Edit Copy Delete	1	2	2	400	799	1

Then in order id will change:

	cartId	userId	productId	productName	qnt	price	totPrice	orderId
☐ Edit Copy Delete	1	1	2	Product 2 Kitchen	2	400	799	1

After that the Thank you page will appear and the order successfully added.

If the user orders for the first time the check out page will appear:

FURNICO

Checkout Form

BUY NOW

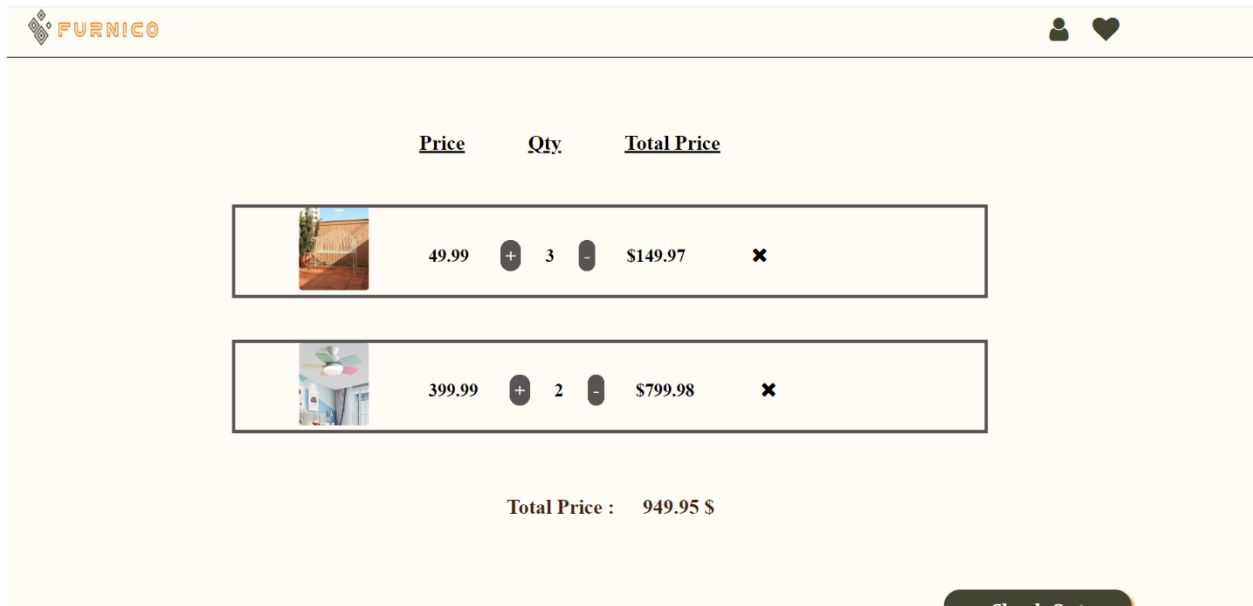

Now the user can insert his information into database in users table.

uFullName	uEmail	uAddress	uCity	uState	uZip	uCardName	uCardNo	uExpM	uExpY	uCvv	isManeger
Shams Aziz	shams@123	542 W. 15th street	New York	NY	10001	Shams Imad	11 10001	October	2018	352	0

Also we can delete the product from the cart page, so it will be deleted from the cart table using the x button:

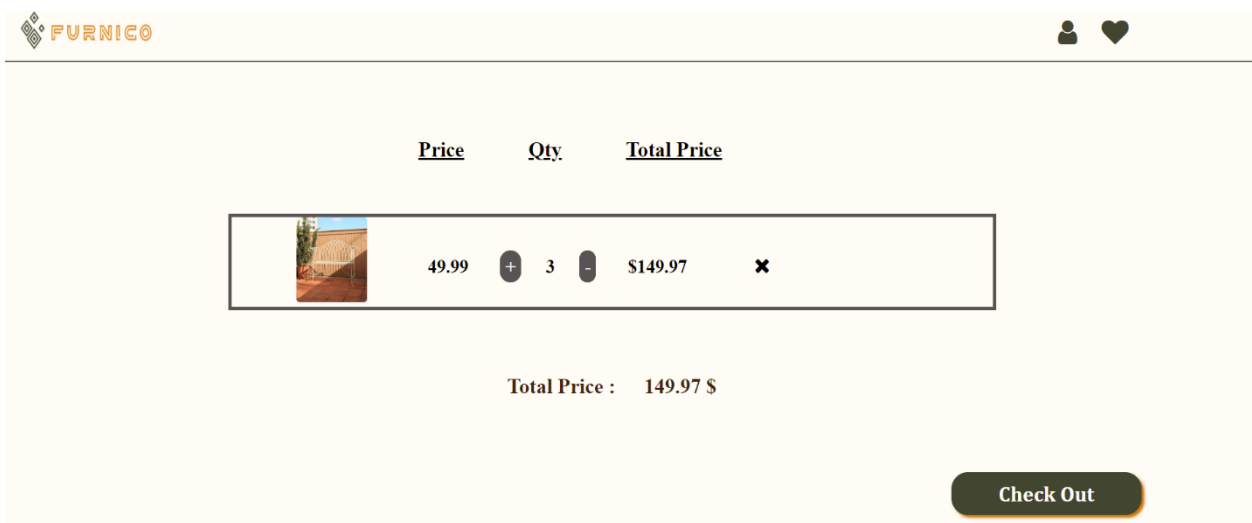

So if the page before deletion is like this:

The cart table in the database will be:

				cartId	userId	productId	productName	qnt	price	totPrice	orderId
☐				1	1	1	Product 1 Kitchen	3	50	149	0
☐				2	1	2	Product 2 Kitchen	2	400	799	0

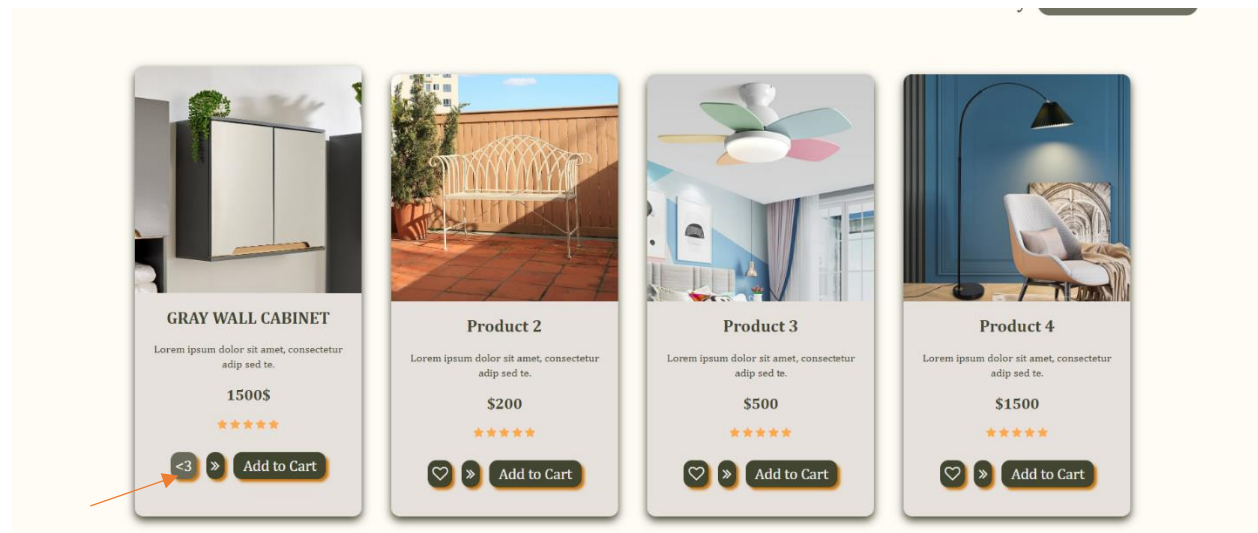

And after deletion, the page will be:

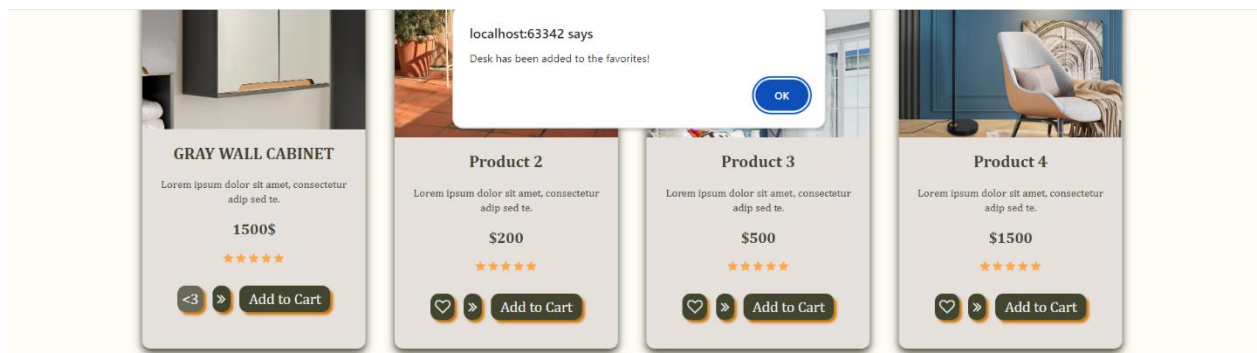

And the cart table in data base will be:

	cartId	userId	productId	productName	qnt	price	totPrice	orderId
☐ Edit ☐ Copy ☐ Delete	1	1	1	Product 1 Kitchen	3	50	149	0

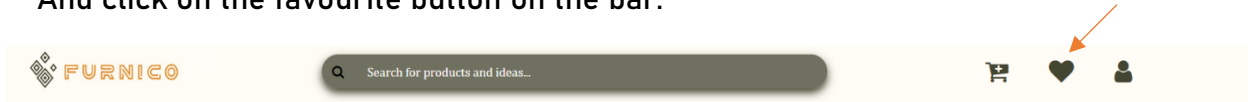

Now for favourite list, if the user clicks on favourite button like this:

And this alert will appears:

And click on the favourite button on the bar:

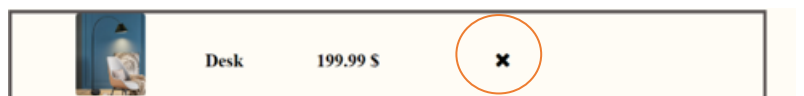

Then this page will appear:

And this will appear in the database:

	userId	productId	productName	price	favId
☐ Edit Copy Delete	2	3	Desk	200	1

If we click on x button then the page will be:

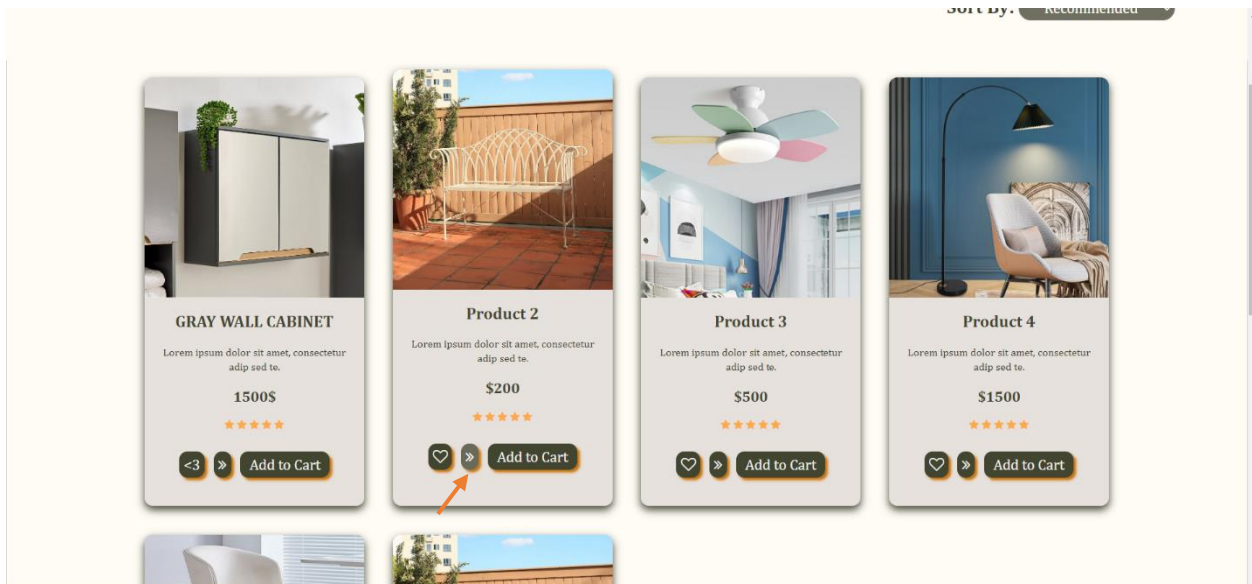

My Favourites

And in database will be removed like this :

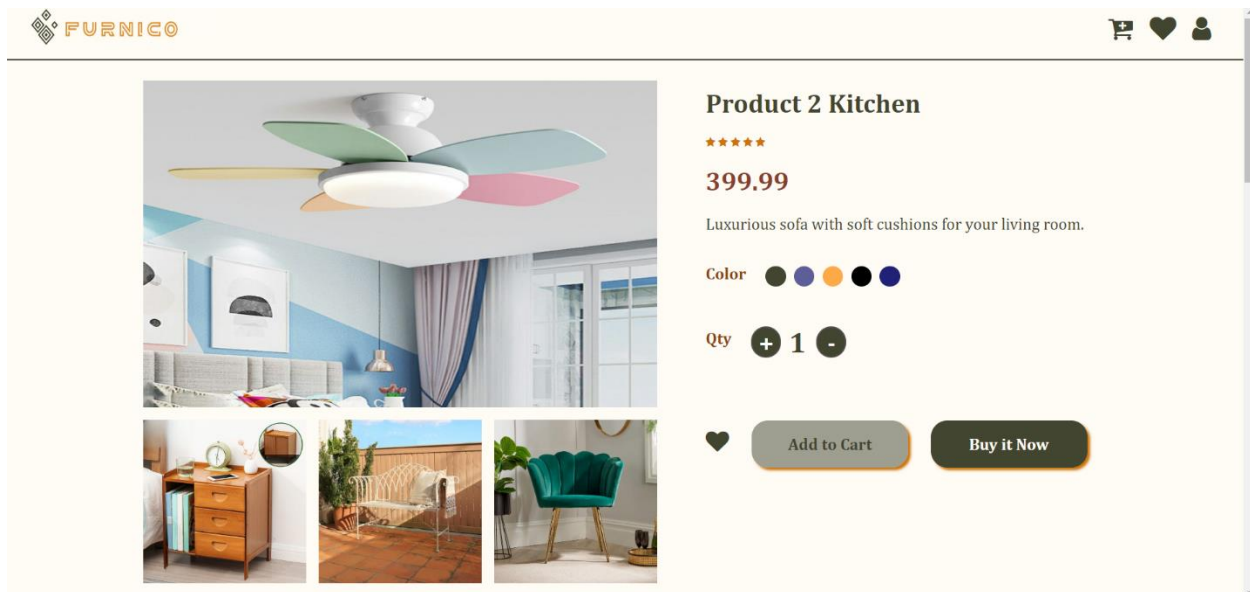

userId	productId	productName	price	favId
--------	-----------	-------------	-------	-------

Query results operations

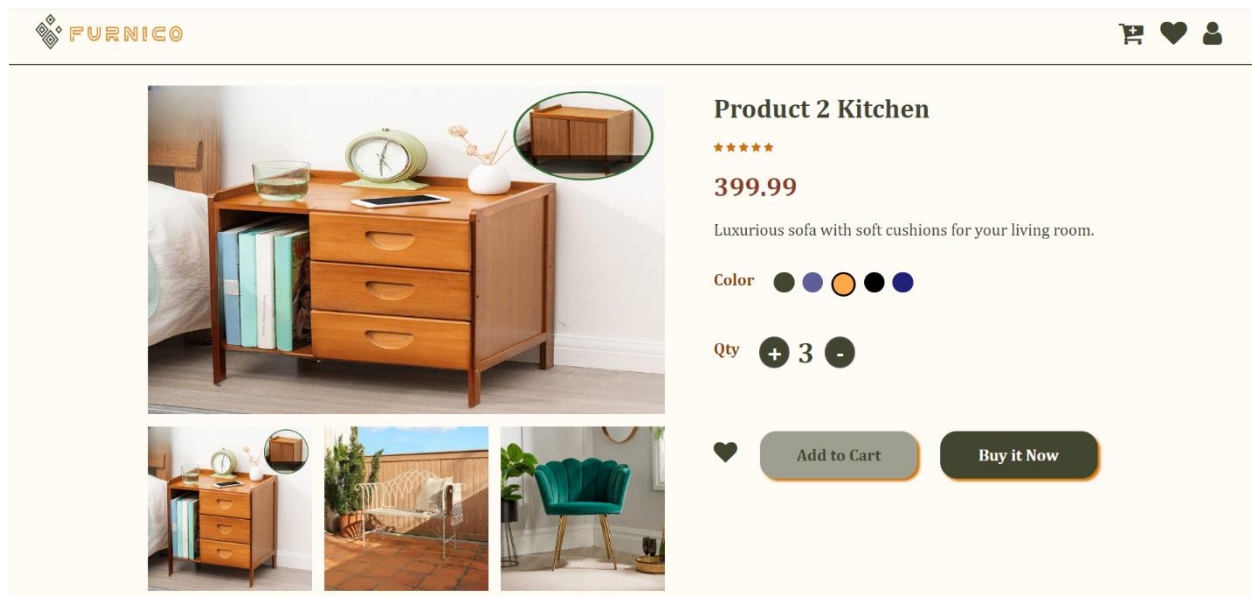

Now to get more clear with the product information, just click on the (>>) button,

Then this page will appears:

so you can change the image, and select the color and quantity you want.

And as we see the data that get from database for this product,

	product_id	name	description	price	category_id	stock_quantity	color	image_url
☐ Edit ☐ Copy ☐ Delete	1	Product 1 Kitchen	Comfortable and sturdy chair for your home or offi...	49.99	1	100	Black	imgs/chair1.jpg
☐ Edit ☐ Copy ☐ Delete	2	Product 2 Kitchen	Luxurious sofa with soft cushions for your living ...	399.99	1	50	Gray	imgs/11200x1200.jpg
☐ Edit ☐ Copy ☐ Delete	3	Desk	Modern and spacious desk for your workspace.	199.99	2	30	Brown	imgs/1200x12010.jpg
☐ Edit ☐ Copy ☐ Delete	4	Product 3 Bed	this is the best bed	140.00	1	100	white	imgs/disk1.jpg

the rest of page:

Shopping Info

Return Policy

Delivery Area Surcharge

may apply when shipping to certain remote areas. Available shipping options and their costs will appear at checkout when you enter a shipping address. Orders has to be processed before it is shipped. The time you wait before receiving the package is made up of Processing Time and Shipping Time.

Processing Time: 7 - 10 Business days.

Please Note: A. Processing Time is calculated from the time you paid and the order is verified (verification Email will be sent after payment). B. You may change your mind after placing the order, including but not limited to: switch to another color, size, style or a different product, changes in address. If that happens, Processing Time is calculated from the time when the order detail(s) is eventually confirmed. A confirmation Email will be sent informing the updated Estimated Delivery Time. C. For holidays, processing time may take longer than it usually is. We will notify you in advanc.

Shopping Info

Return Policy

Litfad.com sticks to the tenet of "quality first, customer foremost". We have a QA team to check your order products before they are packed and sent, but sometimes a return or an exchange is necessary.

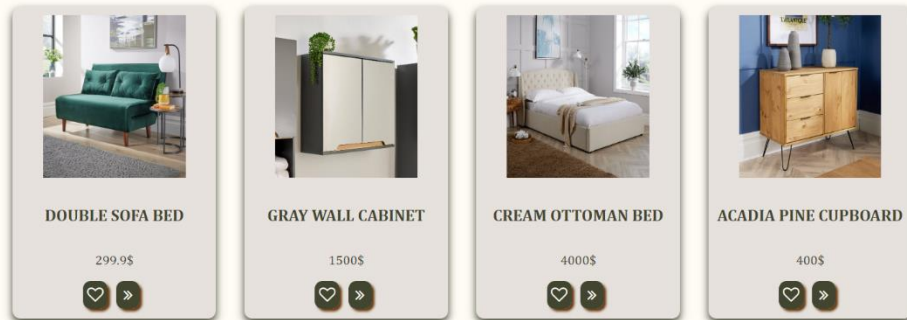

Cancel Policy

All of our products can be canceled until they are shipped. If your order is unpaid, you can easily cancel your order by yourself. If your order has been paid, you can contact our customer service to cancel your order. We cannot guarantee any request to cancel or modify an order once production has already begun. There are no order cancellations accepted once production has begun on any custom or specialty products (items that are not a stock size).

Return Policy

We encourage you to go on a thorough check-up when you receive the package and make sure whether the items are the ones you have specified. If you are going to exchange/return the product, please make sure that they are in the original condition, unused, undamaged and in original package.

Finally, if the manager wants to add new products, he can login as follows to enter his own page.

After login the alert message will appear and the website goes to manager page as the following:

The manager page is similar to products page but additionally the manager can add new products by enter the information of the product in the following form, this to be inserted on database and user page directly.

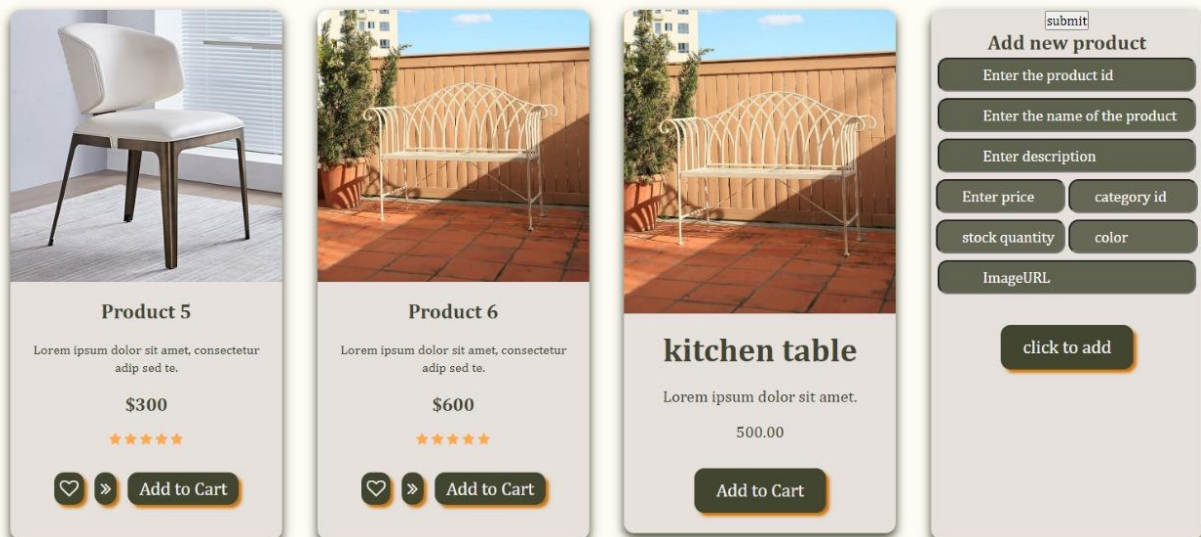

Now after fill the information the manager should click on submit firstly to insert the data into database as shown:

This image shows the 'Add new product' form with the following data entered: product id '20', name 'kitchen table', description 'Lorem ipsum dolor sit amet.', price '500', category id '1', stock quantity '35', color 'white', and ImageURL 'imgs/chair1.jpg'. A 'click to add' button is visible at the bottom of the form.

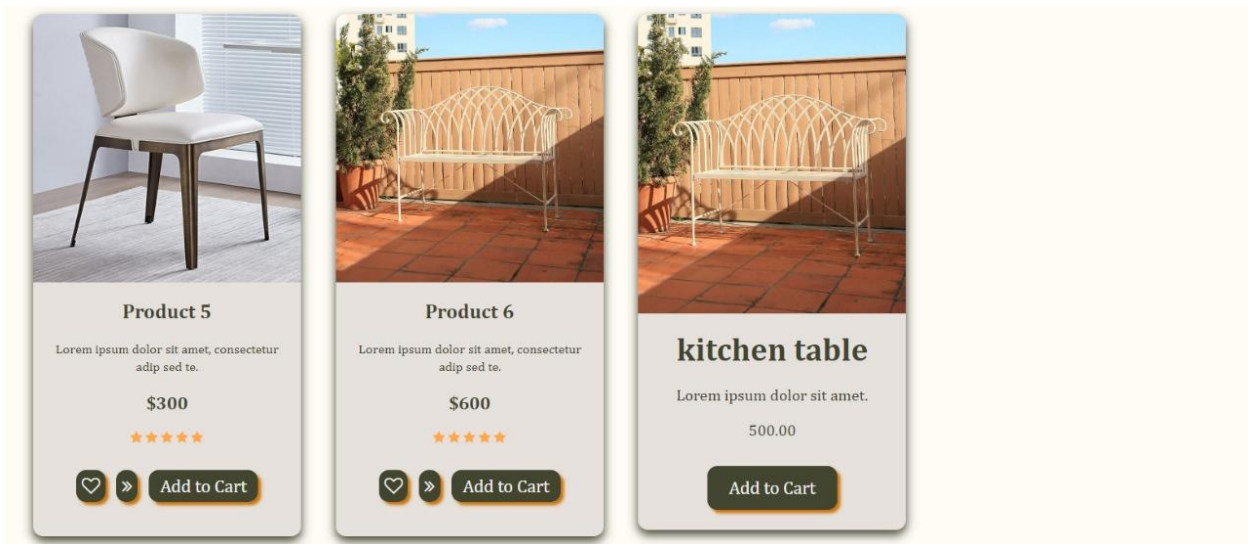

←T→	▼ product_id	name	description	price	category_id	stock_quantity	color	image_url

After that the manager should click on add button to insert the new product into both user and manager page as the following:

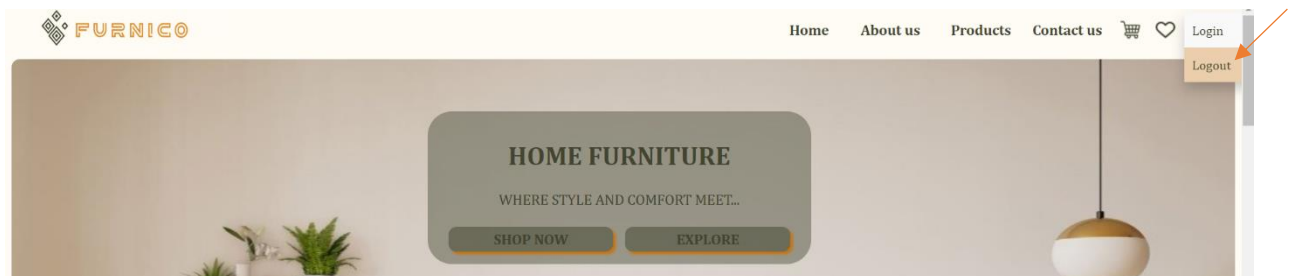

The manager page:

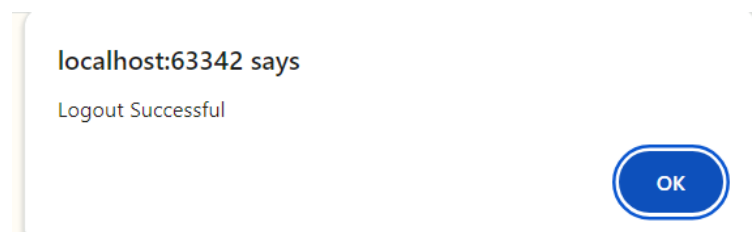

The user page:

For logout, just click on this button in home page:

And this alert will appears:

Conclusion:

Creating a furniture website for our university project was a comprehensive exercise in front-end and back-end development. On the front-end, we crafted an intuitive and visually appealing user interface using HTML, CSS, and JavaScript. The back-end, built with PHP, and MySQL DB in XXAMP, managed user authentication, product management, and order processing through APIs.

This project provided us with practical experience across the entire web development lifecycle, enhancing our technical skills and problem-solving abilities. We successfully navigated challenges in database management, server-side scripting, and interface design, fostering teamwork and creativity.

In summary, this project equipped us with essential web development skills and prepared us for real-world applications, offering valuable insights and experience for our future careers in technology.
